MEDICAL NOTICES.

Dr. C. S. Smith.

Office on Calhoun street, over Hill's Book Store,

Fort Wayne, July 7th.

y1—

HOMOEOPATHY.

P. M. LEONARD, M. D., respectfully tenders

his professional services to the citizens of

Fort Wayne and vicinity, as Homeopath Physician

and Surgeon.

He may be found at the office of

D. A. Kiser, on Calhoun street, bounded north of

Canal Bridge, at all times when not professionally

engaged.

To the Afflicted.

D. R. M. FALCON'S practice is confined entirely

to all obscure or critical diseases such as

CANCERS, TUMORS, ULCERS, SCROFULA, SALT

THREUM, TETTER, ERVSPLEAS, KING'S EVIL,

BARTER'SITCH, SCALD HEAD, FEVER SORES,

PILES, ETC.

DISPESSA, CATARRH, FISKE OR

PUSTULE, CANKER OR NURsing

SORE MOUTH, ETC., ETC.

All Diseases of the Eyes

successfully treated.

His mode of treating CANCERS is by giving

internal, to operate on the blood, and apply

external remedies, which separates the cancer from

the good tissue, and consequently removes it out by

the roots, and with the use of any caustic medicine

or surgical operation.

He has samples of Cancer removed by him, for

any person to examine that wishes, who can also

have samples of his own.

These Pills have never failed in a single instance

in producing the menses.

Too much cannot be said in their favor.

No woman can enjoy good

health when that particular part of the peculiar

organ, heart, lungs, liver, brain, etc., are

sore, lame, languid, debilitated, pain in the head, side

and back, loss of appetite, constipation, &c., are some

of the symptoms which attend irregular menstrua-

tion.

As certain as time is there the Puls to remove

all these symptoms.

Pills will be sent by return mail.

PURIFY THE BLOOD.

Moffat's Life Pills

FREE FROM ALL MINERAL POISONS.

THE great popularity which Moffat's Pills attain,

in consequence of their medical qualities, become so

popular, there have been a great many concoctions

called Stomach Bitters, and often represented as

such.

But Dr. Moffat's Pills are the only ones

which are really efficacious.

Dr. F. W. Kiser, of Fort Wayne, has recently located in

Fort Wayne, and is dwelling on corner of</

Fort Wayne Sentinel.

SATURDAY, MARCH 29, 1857.

HON. S. BRENTON is still lying extremely low with but faint hopes of recovery. On Saturday last his symptoms and prospects were favorable; but on Monday night he suffered a relapse and has since remained in a very precarious condition.

Mr. Walker is an able man, and with the unlimited powers with which he is to be invested may, we hope, succeed in carrying the facts and unprincipled men who have hitherto kept that unfortunate territory in such a ferment.

The CANAL.—The repairs at the Feeder Dam being completed, the water has been drawn off the canal for the purpose of cleaning and removing obstructions. A new trunk will also be put into the St. Mary's Aqueduct. The whole will be completed and the canal ready for navigation by the 15th of April.

Kansas Excitement to be kept up.—It has been decided at a meeting of the ultra abolition faction in Kansas, that they will take no part in the approaching election for delegates to the convention to form a state constitution. If there is a constitution recognizing slavery should be adopted and Kansas become a slave state the friends of freedom may blame the abolitionists for it. A large majority of the settlers—some say as many as five to one—are in favor of making it a free state. But if they are absent themselves from the polls, and leave the Convention entire in the hands of the proslavery party, as a matter of course slavery will be recognized. What a sad commentary on the honesty of the men who have professed such a love for the negro, and bawled themselves hoarse in singing "Kansas shall be free!" The freedom of Kansas is to be sacrificed by these unpatriotic hypocrites, in order that the agitation may be kept up, the happiness and prosperity of the embryo state are to be endangered that factions degenerates may make political capital and seek to keep up a defeated and sinking political organization.

We trust they may fall in this miserable scheme. It is to be hoped that the great bulk of the northern settlers in Kansas may prove too enlightened and too much devoted to freedom to lend themselves to the iniquitous scheme. The fanatics and agitators who have caused all the trouble in Kansas may perhaps keep from the polls, but we have faith in the honesty of the masses, and still hope that Kansas will become a free state.

CONVICTED.—R. J. M. Ward, who recently murdered his wife at Sylvan, Lucas Co., Ohio, and endeavored to hide his crime by burning her body in the kitchen stove, has been found guilty.

We are indebted to Mr. JOHN COSTELLO, of Clatsop, Oregon, now on a visit to this his former residence, for several late and interesting Oregon and California papers.

The Huntingdon Co. Bank has given notice to its business. It is redeeming its notes at par, and the Ad'tor's books show an excess of 10 percent of securities over its circulation.

THE ALLEGHANIANS.—This celebrated and popular company will give a concert at Colerick's Hall on Monday evening next. We believe

of it may be we do not know, nor do we care—it is their own affair, and not ours. The republican press are now busily engaged in fitting this quarrel, and hope to cause a division in the democratic ranks by arraying the friends of each against the other. In this they will act, succeed. No good prudent democrat will endanger the harmony of the party by enlisting under the banner of either, or warning against any democrat who may happen to think more highly of one of the distinguished gentlemen than the other. For our part we think well of both. Both have done well. Gov. Wright was the best governor Indiana had, and though we do not admire his course on the State bank question, we acknowledge his services to the democratic cause, and should be pleased to see him suitably rewarded. So, also, Mr. Bright, who had labored faithfully and effectually in the good cause and done honor to the state by his able and dignified course in the Senate. He has received his reward in the proud position he has earned for himself—and he deserves it.

Politically, we will sustain both, but with their private quarrels we have nothing to do; nor should the democratic party allow itself to become identified with the difficulty. That party made them what they are; but it was not they who made the democratic party, so long as they remain true to their principles; and should they ever attempt to endanger or distract the party, or seek to engrave their disputes upon it, they will at once be disengaged. The democracy of Indiana contend for principles not men, and with the example of New York before their eyes, will never allow themselves to be drawn into anything that might divide the party and destroy its ascendancy in the state. Better lay both on the shelf than endanger the stability of the democratic party.

We doubt not both of these gentlemen understand the position of the democratic party; and we have too high an opinion of their integrity to believe for a moment that either would desire to weaken it by making their personal differences a subject of dissension between their political friends. They would be highly censurable if they did, and would only injure themselves if they attempted it. A few of their warmest and least judicious admirers perhaps might do so, and it is the hope of this that encourages our adversaries to make the attempt to finn this petty quarrel into a matter of political importance. It is a thing we have nothing to do with. It Messrs. Wright and Bright choose to quarrel, let them do it—they are right. But we have no right to destroy the democratic party by embroiling it in any such entanglement. That party has a high, and nobler end in view than fighting the quarrels of any men, however distinguished.

The Township Elections will be held next Monday week. The township offices, though of little advantage to those who hold them, ought to be filled with good, reliable men, as it is highly important that their duties be faithfully and judiciously discharged. Especially is this the case, as regards Trustees, and we think a little more care in the selection of candidates might be ad- vantageous to the public good. We notice in many counties the democrats have held township meetings and nominated their candidates. This means we might secure good officers, and at the same time organize the democratic party in readiness for the fall elections.

Gov. WRIGHT of Indiana is spoken of as likely to be appointed Minister Plenipotentiary to Russia.

UTAH.—It is rumored that the Governorship of Utah will be given to Maj. Ben McCulloch, the celebrated Texas ranger; but the Washington correspondent of the N. Y. Tribune asserts that the appointment has been offered to Mr. McMullen of Virginia. Both of the gentlemen named have qualifications for the arduous station, but we cannot say that we should much envy them their position.

CHICAGO, March 23.—Governor Gorman, of Minnesota, has issued a proclamation for the extension of the Legislature, to be held April 27, for the purpose of making necessary laws to enable the House of Lords, and has been sent to Teheran for Ratification.

This is an extremely well written and interesting story, containing a good moral, and inciting the christian truth and the necessity of living up to the divine precept of doing unto others as you would that they should do unto you. The characters are well drawn and sustained, and the snobbish feeling which tempts many purse-proud aristocrats, even in this land of equality, to look down on the poor as an inferior race, is rebuked in a proper and christian manner. It is a work that will be read with pleasure by the religious, and with advantage by the worldly.

For sale at Hill & Jacobs'.

Governor of Kansas.—Hon. Robert J. Walker, it is stated, has been appointed Governor of Kansas. At first he peremptorily declined, but subsequently accepted, after a free consultation with the Cabinet, with the understanding that he is not to be embarrassed in any manner, and that the Administration is to make such appointments to the Territory as he may suggest.

Mr. Walker is an able man, and with the limited powers with which he is to be invested may, we hope, succeed in carrying the facts and unprincipled men who have hitherto kept that unfortunate territory in such a ferment.

The End of the World at Hand.—Paris is very much excited by an astronomical controversy at which all do not laugh! The two most eminent astronomers, one of France and the other of Germany, are arguing whether the world is to come on *an end on the thirteenth of June next!* All the scientific world, it appears, have long been uneasy at the approach of the comet to our earth; and though it is conceded by the disbelievers that the comet must take place in June next they argue (or Mons. Babinet the French astronomer, for them) that, as comets are but atmospheric affairs, it will not materially affect the German, on the contrary, says that it will not merely be the passing of a "gentleman who smokes," but that its centre is solid fire and that the surface of the earth will be turned into a sea of fiery lava, by his formidable cigar!—The millennium, of course, is to turn out a fiction, and hundreds of delinquent newspaper readers will barely have time to settle up before the end of all things arrives. We trust those indebted to us will take warning and put their houses in order in season. What an awful thing it would be to be caught at such a time with an unpaid printer's account in your pocket!

Convicted.—R. J. M. Ward, who recently murdered his wife at Sylvan, Lucas Co., Ohio, and endeavored to hide his crime by burning her body in the kitchen stove, has been found guilty.

We are indebted to Mr. JOHN COSTELLO, of Clatsop, Oregon, now on a visit to this his former residence, for several late and interesting Oregon and California papers.

The Huntingdon Co. Bank has given notice to its business. It is redeeming its notes at par, and the Ad'tor's books show an excess of 10 percent of securities over its circulation.

THE ALLEGHANIANS.—This celebrated and popular company will give a concert at Colerick's Hall on Monday evening next. We believe

of it may be we do not know, nor do we care—it is their own affair, and not ours. The republican press are now busily engaged in fitting this quarrel, and hope to cause a division in the democratic ranks by arraying the friends of each against the other. In this they will act, succeed. No good prudent democrat will endanger the harmony of the party by enlisting under the banner of either, or warning against any democrat who may happen to think more highly of one of the distinguished gentlemen than the other. For our part we think well of both. Both have done well. Gov. Wright was the best governor Indiana had, and though we do not admire his course on the State bank question, we acknowledge his services to the democratic cause, and should be pleased to see him suitably rewarded. So, also, Mr. Bright, who had labored faithfully and effectually in the good cause and done honor to the state by his able and dignified course in the Senate. He has received his reward in the proud position he has earned for himself—and he deserves it.

BRIGHT AND WRIGHT.—It is well known that an unhappy feud exists between Hon. Jesse D. Bright and Gov. Wright. What the precise cause of it we do not know, nor do we care—it is their own affair, and not ours. The republican press are now busily engaged in fitting this quarrel, and hope to cause a division in the democratic ranks by arraying the friends of each against the other. In this they will act, succeed. No good prudent democrat will endanger the harmony of the party by enlisting under the banner of either, or warning against any democrat who may happen to think more highly of one of the distinguished gentlemen than the other. For our part we think well of both. Both have done well. Gov. Wright was the best governor Indiana had, and though we do not admire his course on the State bank question, we acknowledge his services to the democratic cause, and should be pleased to see him suitably rewarded. So, also, Mr. Bright, who had labored faithfully and effectually in the good cause and done honor to the state by his able and dignified course in the Senate. He has received his reward in the proud position he has earned for himself—and he deserves it.

Politically, we will sustain both, but with their private quarrels we have nothing to do; nor should the democratic party allow itself to become identified with the difficulty. Governor of Kansas.—Hon. Robert J. Walker, it is stated, has been appointed Governor of Kan-

Terrible Conflagration!—Plymouth Al-

most Destroyed!—The most destructive fire with which this place was ever visited occurred on Sunday morning, the 22d inst., about 1 o'clock.

The entire block of buildings on Michigan between LaPorte and Garro streets, with the exception of Mr. Corbin's residence, is a mass of

ashes.

Additional reinforcements were being di-

pached from England.

It is reported that commissioner Bowring has been recalled by the British Government.

Also, that on the 5th of December the Chi-

ness seized the East India Company's opium

depot.

The Neuchatel Conference opened at Paris

on the 5th inst.

The proceedings were private.

All the foreign troops have left Greece.

Plymouth, Mass.—Orders were received

here this morning that Colonel Lemm, 11th

regt., 22 corps, amp; 1,000 men of the Roy-

al Marines of this Division, were to be sent

to China in readiness to embark for China.

Neri Kahn, an attaché of Ferencz Kahn,

on the 21st, arrived with the treaty.

[Continued from the First Page.]
Whilst she left the room to put on her bonnet and shawl, Karl T. — (for the reader would not have guessed that the young man was no other than our hero) glanced over the writing of the girl in the book, and his eyes filled with tears of emotion and delight as he read the outpouring of a pure and plow's heart; and when they had left the house together, and she was walking beside him with a dignity of which she seemed entirely unconscious, he cast upon her looks of respect and admiration.

They first went to Madame Berg, who did not give the advance required, but assured the young man that Bertha was an angel. Certainly this price Mr. T. — valued higher than the money he had asked for. They pawned the book, and the required sum was made up. Bertha was delighted.

"But if you spend all your money to-day," remarked the young man, "on what will you live to-morrow?"

"I do not know, but I trust in God. I shall wear the white night through."

"I trust in God firmly, and He will help you," responded Karl with an enthusiasm which almost betrayed the emotion he felt.

When they came to the tavern, the young man, when in first to prepare old Mr. Schmidt for the part he wished him to act; then he betrothed Bertha. It is impossible to describe the joy he felt when he saw the young girl throw herself in her father's arms, and press him to her heart.

"O father," said she, "what a dreadful night have I had—how weary I have been about you, but, thank God, I have you again;" and her face brightened up with a smile of joy.

He paid the bill, and triumphantly led him home. T. — accompanied them, and said he had a few more knuckles in his pocket; she had better get them something to eat. And then you should have seen th' darling girl, how she clung to her, and how she set about it; the young man all as if he could fall at her feet at anything he said. It was late before T. — went to bed that night; but the leap from the sofa, T. — was in no more of thought. He came to the house very evening, in order as he said, to see with whom his scanty earnings.

At noon the next afternoon, as he was going away in the evening, he said to Bertha, "Well, if you become my wife, I may be a poor clerk, but I am not an orphan."

Bertha blushed, and cast her eyes to the ground.

"Can you love me, Bertha?" he asked again in an overflow of feeling.

She was silent, and did not raise her head; but the look in her eye told her he had hit the nail on the head.

"I am forever grateful to you, for saving me from such a life."

"I am forever grateful, as he was going away in the evening, he said to Bertha, "Well, if you become my wife, I may be a poor clerk, but I am not an orphan."

Bertha blushed, and cast her eyes to the ground.

"I am forever grateful to you, for saving me from such a life."

After two days, after the young couple, simply but exceedingly kindred, and accompanied by their parents, went to church, where they were received in a quiet way. When they came out, and went to a elegant carriage was standing at the door, and a footman in rich livery let down the steps.

"Good!" said the happy husband to his beloved wife, who looked at him with amazement.

Before she could utter a word, the three were seated in the carriage, driving away at a quiet pace. The carriage stopped before a splendid a house in the best part of Franklin. They were admitted by a number of domestics, who conducted them to apartments decorated in the most elaborate style.

"This is your master's," said T. — to the servants; and her commands you have henceforth to obey. My darling wife," said he then, turning to Bertha, "I am Karl T. —, one of the wealthiest men of this city. This house is yours, and these servants will attend on you. I hold a large fortune from you that riches will not corrupt your heart. Here it is, in the prayer-book of your mother, written by your own hand: 'If I have a wretched to give me all the treasures of the world, O Lord, I would still remain Thine humble servant. For what is gold before Thee, that hast it to the heart? Thine is my heart, and to it shall remain!'"

"It is the Lord's and thine, my beloved Karl," replied Bertha, and sank in his arms.

"Hurrah for the leap from the Main Bruckel," exclaimed T. —, embracing his father-in-law.

A New Material for Gas.—Last evening, Professor Hill delivered his second lecture before the Mechanics' Institute on "The Gases Employed or Generated during the process of our manufacturing industry." A considerable portion of the lecture was devoted to the subject of "Illuminating gas," and the various modes of its preparation, and much interest was excited by an experiment in which very light gas was produced from a species of bituminous shale—a stone very common in Canada, there being in the Province many cubic miles of it. It extends from Whitchurch and Oshawa on Lake Ontario, to Collingwood in the Georgian Bay, and is found in great abundance in other parts of Canada. Professor Hill stated that the gas produced from Uteca slate, the substance in question, has a percentage of the illuminating principle, double that produced from coal. Another advantage possessed by the slate over coal, in the production of gas, is the fact that the former does not swell in the retorts when subjected to heat. Several of our practical men ought at once to look into this matter. In Whitchurch and Collingwood slate is better adapted than coal for producing illuminating gas, by all means let it be used to its best account, in that way as speedily as possible.

—*Franklin Gazette.*

A Mexican Barometer.—On board the Mexican steamer is a barometer of the most simple construction. It consists only of a long strip of cedar, thin, about two and a half feet in length, about an inch wide, cut with the grain, and set in a block of pot. This cedar strip is backed or lined with one of white pine, cut across the grain, and the two are tightly glued together. To bend them when dry is to snap them, but on the approach of bad weather, the cedar curls over until the top, at times, touches the ground. This simple instrument is the invention of a Mexican guitar maker, and such is its accuracy, that will indicate the coming on of a shower. It is the first to indicate any other kind of weather known on the coast. Had this been the production of Yankee ingenuity, it would have been patented long ago, and a fortune made by the inventor.—*Mobile Register.*

A Good Remedy.—The local of the Linchburg Virginian publishes the following, and says it has tried it and found it to be a good remedy:

To cure a pain in the breast, procure a well made silk or woolen dress, with an equally well constructed woman inside of it—and press close to the part affected. Repeat the application till the pain ceases. The recipe when so directed is carefully observed, has rarely been known to fail in effecting a cure. The medicine is found in almost every household, and may possibly cost a trifle.

The St Louis Presbyteria gives the following:

A newspaper writer, imitating the prevalent practice among editors of putting everybody who has shown them some "civility" for their courteous and gentlemanly conduct," returns his thanks to the parson and proprietors of the Stone Church, in a city he had just visited for the privilege of promenading up and down the broad aisle of the same on Sunday last—in search of a seat—unmolested.

Viva Viva.—A great member of the Nebraska Legislature, when the election of the Assistant Clerk came up, called out—Mr. Speaker, I move we vote *viva viva*. The whole house burst into a roar, and not knowing what it meant greenly asked his right hand man if it was not in order, adding that he didn't know anything about these damned parliamentary rules!

FOR SALE.

I OFFER for sale on liberal terms of payment—
LOTS 11 and 12 in block 23, Ewing's Addition
(no late payment), \$3,000.
A lot 50x100 feet adjoining Mr. F. Niedlinger's,
at 1st 540, Anna's addition. Price \$1,000.

42 Acres of Land, 14 miles from town, adjoining
James Embrey's farm on the south, and Simon
Embreys farm on the west; 40 acres are well clear-
ed and fenced. Price \$1,000.

40 Acres of Land near the Piqua Road, 21 miles from
Fort Wayne, 8 acres cleared, the balance wet;
timbered. Price \$500.

The above property, rapidly rising in value, and
presently a valuable investment for investment to persons
desiring to invest in and near Fort Wayne.

As the price Mr. T. — valued higher than the money
he had asked for. They pawned the book, and the
required sum was made up. Bertha was delighted.

But if you spend all your money to-day," re-
marked the young man, "on what will you live
to-morrow?"

"I do not know, but I trust in God. I shall
wear the white night through."

"I trust in God firmly, and He will help
you," responded Karl with an enthusiasm which
almost betrayed the emotion he felt.

When they came to the tavern, the young man,
when in first to prepare old Mr. Schmidt for the
part he wished him to act; then he betrothed Bertha. It is impossible to describe the joy he
felt when he saw the young girl throw herself in
her father's arms, and press him to her heart.

Then he paid the bill, and triumphantly led him
home. T. — accompanied them, and said he had
a few more knuckles in his pocket; she had
better get them something to eat. And then you
should have seen th' darling girl, how she
clung to her, and how she set about it;

the young man all as if he could fall at her
feet at anything he said. It was late before T. —
went to bed that night; but the leap from
the sofa, T. — was in no more of thought.

He came to the house very evening, in order as he said,
to see with whom his scanty earnings.

At noon the next afternoon, as he was going away
in the evening, he said to Bertha, "Well, if you
become my wife, I may be a poor clerk, but I am
not an orphan."

Bertha blushed, and cast her eyes to the ground.

"I am forever grateful to you, for saving me from
such a life."

"I am forever grateful, as he was going away
in the evening, he said to Bertha, "Well, if you
become my wife, I may be a poor clerk, but I am
not an orphan."

Bertha blushed, and cast her eyes to the ground.

"I am forever grateful to you, for saving me from
such a life."

After two days, after the young couple,
simply but exceedingly kindred, and accompanied by
their parents, went to church, where they were
received in a quiet way. When they came out,
and went to a elegant carriage was standing at
the door, and a footman in rich livery let down
the steps.

"Good!" said the happy husband to his
beloved wife, who looked at him with amazement.

Before she could utter a word, the three were
seated in the carriage, driving away at a quiet
pace. The carriage stopped before a splendid
house in the best part of Franklin. They were
admitted by a number of domestics, who conducted
them to apartments decorated in the most
elaborate style.

"This is your master's," said T. — to the
servants; and her commands you have henceforth
to obey. My darling wife," said he then, turning
to Bertha, "I am Karl T. —, one of the
wealthiest men of this city. This house is yours,
and these servants will attend on you. I hold
a large fortune from you that riches will not
corrupt your heart. Here it is, in the prayer-book
of your mother, written by your own hand: 'If
I have a wretched to give me all the treasures
of the world, O Lord, I would still remain Thine
humble servant. For what is gold before Thee,
that hast it to the heart? Thine is my heart,
and to it shall remain!'"

"It is the Lord's and thine, my beloved Karl,"
replied Bertha, and sank in his arms.

"Hurrah for the leap from the Main Bruckel,"
exclaimed T. —, embracing his father-in-law.

A New Material for Gas.—Last evening, Professor Hill delivered his second lecture before the Mechanics' Institute on "The Gases Employed or Generated during the process of our manufacturing industry." A considerable portion of the lecture was devoted to the subject of "Illuminating gas," and the various modes of its preparation, and much interest was excited by an experiment in which very light gas was produced from a species of bituminous shale—a stone very common in Canada, there being in the Province many cubic miles of it. It extends from Whitchurch and Oshawa on Lake Ontario, to Collingwood in the Georgian Bay, and is found in great abundance in other parts of Canada. Professor Hill stated that the gas produced from Uteca slate, the substance in question, has a percentage of the illuminating principle, double that produced from coal. Another advantage possessed by the slate over coal, in the production of gas, is the fact that the former does not swell in the retorts when subjected to heat. Several of our practical men ought at once to look into this matter. In Whitchurch and Collingwood slate is better adapted than coal for producing illuminating gas, by all means let it be used to its best account, in that way as speedily as possible.

—*Franklin Gazette.*

A Mexican Barometer.—On board the Mexican

steamer is a barometer of the most simple

construction. It consists only of a long strip of cedar, thin, about two and a half feet in length, about an inch wide, cut with the grain, and set in a block of pot. This cedar strip is backed or lined with one of white pine, cut across the grain, and the two are tightly glued together. To bend them when dry is to snap them, but on the approach of bad weather, the cedar curls over until the top, at times, touches the ground. This simple instrument is the invention of a Mexican guitar maker, and such is its accuracy, that will indicate the coming on of a shower. It is the first to indicate any other kind of weather known on the coast. Had this been the production of Yankee ingenuity, it would have been patented long ago, and a fortune made by the inventor.—*Mobile Register.*

<

SATURDAY, MARCH 28, 1857.

TION. S. BREXROS is still lying extremely low, but his faint hopes of recovery last his symptoms and prospects were favorable; but on Monday night he suffered a relapse and has remained in a very precarious condition.

THE CANAL.—The repairs at the Feeder Dam being completed, the water has been drawn off the canal for the purpose of cleaning and removing obstructions. A new trunk will also be put into the St. Mary's Aqueduct. The whole will be completed and the canal ready for navigation by the 15th of April.

KANSAS'S EXCITEMENT TO BE CLEARED UP.—It has been stated at a meeting of the ultra-slavery faction in Kansas, that they will take no part in the approaching election for delegates to the convention to form a state constitution. If there is a constitution recognizing slavery should be adopted and Kansas become a slave state, the friends of freedom may blame the abolitionists for it. A large majority of the settlers—some say as many as five to one—are in favor of making it a free state. But if they absent themselves from the polls, and leave the Convention entirely in the hands of the pro-slavery party, as a matter of course slavery will be recognized. What a sad commentary on the honesty of the men who have professed such a love for the progress, and bawled themselves hoarse in singing "Kansas shall be free!" The freedom of Kansas is to be sacrificed by these unprincipled hypocrites, in order that the agitation may be kept up; the happiness and prosperity of the embryo state are to be endangered that factious demagogues may make political capital; and seek to keep up a defeated and sinking political organization.

We trust they may fail in this miscalculated scheme. It is to be hoped that the great bulk of the northern settlers in Kansas may prove enlightened and too much devoted to freedom to lend themselves to the iniquitous scheme. The fanatics and agitators who have caused all the trouble in Kansas may perhaps leap from the polls, but we have faith in the honesty of the mass, and still hope that Kansas will become a free state.

BRIGHT AND WRIGHT.—It is well known that an unhappy feud exists between Hon. Jesse D. Bright and Gov. Wright. What the precise cause of it may be we do not know, nor do we care—it is their own affair, and not ours. The republican press are now busily engaged in fomenting this quarrel, and hope to cause a division in the democratic ranks by arraying the friends of each against the other. In this they will succeed. No good prudent democrat will endanger the harmony of the party by enlisting under the banner of either, or waging against any democrat who may happen to think himself higher of one of the distinguished gentlemen than the other. For our part we think well of both. Both have done well. Gov. Wright was the best governor Indiana had, and though we do not admire his course on the State bank question, we acknowledge his services to the democratic cause, and should be pleased to see him suitably rewarded. So, also, Mr. Bright, he had labored faithfully and effectually in the good cause, and done honor to the state by his able and dignified course in the Senate. He has received his reward in the proud position he has earned for himself—and he deserves it.

POLITICALLY, we will sustain both, but with their private quarrels we have nothing to do nor should the democratic party allow itself to be come identified with the difficulty. That party made them what they are; but it was not they who made it a democratic party. So long as they remain true they will be sure to say more—Mrs. Sulley has received her new fashions, and the ladies all know that they will be worthy inspection.

Removal of Apothecaries' Hall.—Mr. Winslow has removed to the store lately occupied by Wolf, opposite the post office. He has on hand a good stock of Drugs, Medicines, Paints, gourds, Wines and Liquors, Family Groceries, &c. which he offers at the lowest prices, and pays particular attention to putting up prescriptions. His excellence and cheapness of his goods, and his courteous attention to his customers, fairly entitle him to a liberal share of public patronage.

Better than ever.—It is a notorious fact that Orr's old No. 3 is always well filled with both adversaries to make the attempt to fan this party, and it is the hope of this that encourages our quarrel into a matter of political importance. It exceeds itself. So large, beautiful, fashionable, and varied an assortment of goods has rarely Wright and Bright chosen to quarrel, let them be witnessed here as they have just received, do so—it is their right. But we have no right to destroy the democratic party by embroiling it in any such entanglement. That party has a higher and nobler end in view than fighting the quarrels of any men, however distinguished.

The Township Elections will be held next Monday week. The township offices, though of little advantage to those who hold them, ought to be filled with good, reliable men, as it is highly important that their duties be faithfully and judiciously discharged. Especially is this the case as regards Trustees, and we think a little more care in the selection of candidates might be advantageous to the public good. We notice in many counties the democrats have held township meetings and nominated their candidates. This we believe has not hitherto been the usage in this county; but we think it is now time to adopt it. We would therefore recommend the township committees to call meetings and nominate regular democratic tickets in each township. By these means we might secure good officers, and at the same time organize the democratic party in readiness for the full elections.

Gov. WAICUTT of Indiana is spoken of as likely to be appointed Minister Plenipotentiary to Russia.

UTAH.—It is rumored that the Governorship of Utah will be given to Maj. Ben McCulloch, the celebrated Texas ranger; but the Washington correspondent of the N. Y. Tribune asserts that the appointment has been offered to Mr. McMullen of Virginia. Both of the gentlemen named have qualifications for the arduous station, but we cannot say that we should much envy them their position.

For sale at Hill & Jacobs'.

Chicago, March 23.

Governor Gorman, of Minnesota, has issued a proclamation for an extra session of the Legislature, to be held April 27, for the purpose of making necessary laws to enable the people to form a State Constitution, and also for the purpose of disposing of the lands granted at the last session of Congress to aid railroads.

Terrible Conflagration!—Plymouth almost Destroyed!

The most destructive fire with which this place was ever visited occurred on Sunday morning, the 22d inst., about 1 o'clock.

The entire block on Michigan between LaPorte and Garro streets, with the exception of Mr. Cobin's residence, is a mass of ruins!

The fire did not cross the alleys on the east or west side of Michigan street, which, considering that it crossed over from the east to the west side of Michigan street, is somewhat singular.

The fire did not cross the alleys on the east or west side of Michigan street, which, considering that it crossed over from the east to the west side of Michigan street, is somewhat singular.

[Continued from the First Page.]

Whilst she left the room to put on her bonnet and shawl, Karl T. (for the reader would not have guessed that the young man was not other than our hero) glanced over the writing of the girl in the book, and his eyes filled with tears of emotion and delight as he read the outpouring of a pure and pious heart; and when they had left the hour together, and she was walking home with a dignity of which she seemed entirely unconscious, he cast upon her looks of respect and admiration.

They first went to Madame Berg, who did not give the advance required, but assured the young man that Bertha was an angel. Certainly this price Mr. T. valued higher than the money he had asked for. They pawned the book, and the required sum was made up. Bertha was a joy.

"But if you spend all your money to-day," remarked the young man, "on what will you live to-morrow?"

"I do not know. Let me trust in God. I shall work the whole night through."

"Yes, trust in God firmly, and He will help you," exclaimed Karl with an enthusiasm which almost betrayed the emotion he felt.

When they came to the tavern, the young man in his first to procure old Mr. Schmidt for the part he wished him to act; then he fetched Bertha. It is impossible to describe the joy he felt when the young girl threw herself in her father's arms, and press him to her heart.

"O, father," said she, "what a dreadful night have I had—how uneasy I have been about you! But thank God, I have you again," and her face brightened up with a smile of joy.

She paid the bill, and triumphantly led him to me. T. — accompanied them, and said he had a few more knots in his pocket; she had her g— and get them something to eat. And then you should have seen ths darling girl, how she buried herself, and how she set about it like a young man fit as he could fall at her feet and worship her. It was late before T.— got home that night; but the leap from the train Brink was no more thought of. He came to the house every evening, in order as he said, to talk with them on their scanty earnings.

About a fortnight after, as he was going away one evening, he said to Bertha, "Will you become my wife? I am only a poor clerk, but I am honest and upright."

Bertha blushed, and cast her eyes to the ground.

"Can you love me, Bertha?" he asked again, in an overflow of feeling.

She was silent, and did not raise her head; but she did let her hand. He seized it, and kiss it fervently.

"Bertha," said he, "I love you immeasurably; you have saved my life."

A few days after, the young couple, simply but respectfully attired, and accompanied by Mr. Schmidt, went to church, where they were married in a quiet way. When they came out in the w—, an elegant carriage was standing at the door, and a footman in rich livery let down the step.

"Come," said the happy husband to his beloved wife, who looked at him with amazement.

Before she could utter a word, the three were seated in the carriage, driving away at a quick pace. The carriage stopped before a splendid house in the best part of Frankfort. They were received by a number of domestics who conducted them to apartments decorated in the most costly style.

"This is your mistress?" said T.— to the servants; and her commands you have henceforth to obey. My darling wife," said he then turning to Bertha, "I am Karl T.—, one of the w—est men of this city. This house is yours, and these servants will attend on you. I hold a pledge from you that riches will not corrupt your heart. Here it is, in the prayer-book of your p— or mother, written by your own hand: If thou wert to give me all the treasures of the world, O Lord, I would still retain Thine humble servant. For what is gold before Thee, that breathes into the heart? Thine is my heart, and Thine it shall remain."

"It is the Lord's and thine, my beloved Karl," whispered Bertha, and sank in his arms.

"Hurrah for the leap from the Main Brückel!" exclaimed T.—, embracing his father-in-law.

A New Material for Gas—Last evening, Professor Hind delivered his second lecture before the Mechanics' Institute, on The Cases Employed or Generated during the process of our manufacturing industry. A considerable portion of the lecture was devoted to the subject of "Illuminating gas," and the various modes of its preparation, and much interest was excited by an experiment in which a very light gas was produced from a species of bituminous shale—a rock very common in Canada, there being in the Province many cubic miles of it. It extends from Whithy and Oshawa on Lake Ontario, to Cincinno on the Georgian Bay, and is found also in great abundance in other parts of Canada. Professor Hind stated that the gas produced from this slate, the substance in question, has a percentage of the illuminating principle, double of that produced from coal. Another advantage possessed by the slate over coal, in the production of gas, is the fact that the former does not swell in the retorts when subjected to heat. Some of our practical men ought at once to look into this matter. If Whithy and Cincinno slate is better adapted than coal for producing illuminating gas, by all means let it be used to good account in that way as speedily as possible.

—*Toronto Globe.*

A Mexican Barometer.—On board the Mexican steamer is a barometer of the most simple construction. It consists only of a long strip of cedar, very thin, about two and a half feet in length, about an inch wide, cut with the grain, and set in a block or foot. This cedar strip is buckled or lined with one of white pine, across the grain, and the two are tightly glued together.

To bend these when dry is to snap them, but on the approach of bad weather, the cedar curls over until the top, at times, touches the ground. This simple instrument is the invention of a Mexican gunner, and such is its accuracy, that it will indicate the coming on of a "norther" full twenty-four hours before any other kind of barometer known on the coast. Had this been the production of Yankee ingenuity, it would have been patented long ago, and a fortune made by the inventor.—*Mobile Register.*

A Good Remedy.—The local of the Linchburgh Virginian publishes the following, and says he has tried it and found it to be a good remedy:

To cure a pain in the breast, procure a well-made silk or woolen dress, with an equally well-constructed woman inside of it—and press close to the part affected. Repeat the application till the pain ceases. The recipe, when the disease is carefully observed, has rarely been known to fail in effecting a cure. The medicine is found in almost every household, and may possibly cost a trifle.

The St Louis Presbyteria gives the following:

A newspaper writer, imitating the prevalent practice among editors of pulling everybody who has shown them courtesy, civil for their courtesies and gentlemanly conduct, returns his thanks to the parson and proprietors of the Stone Church, in a city he had just visited for the privilege of promenading up and down the broad aisle of the same on Sunday last—in search of a seat—unnoticed.

Viva Voce.—A green member of the Nebraska Legislature, when the election of the Assistant Clerk came up, called out—Mr. Speaker, I move we vote *viva voce*. The whole house burst into a roar, and not knowing what to make of it, many asked his right hand man if it was not in order, adding that he didn't know anything about these damned parliamentary rules!

FOR SALE.

I OFFER for sale on liberal terms of payment—OTS 11, and 12 in block 21, Ewing's Addition. (See my residence), price \$3,000. V. S. in the month of Oct. 20 last (adjoining M. F. Niedlinger's), \$11, 510, Hamm's addition. Price \$1,000.

NEW YORK, MARCH 24, 1857.

The day is passing extremely low, and the weather very cool. On Saturday evening the winds were so bad that the telegraph office was closed, and the mail耽 in many portions could not be sent. The report of the Federal Bank of New York has been drawn off, and the amount of the new bank is now \$1,000,000. A new bank will be open on Monday, and the earth ready for man's work on April 1st.

The *Evening Post* says—It has been decided that the day will be put off to the 1st of April, and the earth ready for man's work on April 1st. All the scientific world, it appears have long been awaiting the approach of the month of April, and though it is evident by the date of the confederation that the confederacy will take place in June next, they argue (or think) that the French will have a share in the formation of the confederacy, and that, as events are not to be foreseen, it may be necessary to postpone the meeting of the confederacy to the 1st of April.

But they allow themselves that the surface of the earth is solid and firm, and leave the Convention undivided, but the pro-slavery party, as a majority, will be recognized. What a glorious opportunity for the South to have the government of the country, and for the slaves to have their rights secured in favor of making the country safe for all.

Concord—R. J. Ward, who recently

murdered his wife in Sylvania, Ohio, and endeavored to hide his crime by burning her body in the kitchen fire, has been found guilty.

We are indebted to Mr. John Costello, of Clatsop, Oregon, now on a visit to the city, his former residence, for several late and interesting Oregon and California papers.

The *Hawthorne Co. Bank* has given notice to close business. It is reducing its notes at par, and the Auditor's account shows an excess of 10 percent of securities over its circulation.

The ALLEGHENIES—This celebrated and popular company will give a Concert at Coleraine and then Wright. When the grand Hall on Monday evening next. We believe the 21st may we do not know, do we have never visited Fort Wayne, but from what we have seen of the highly favorable notices we set our partners in the course of our tour, we have faith in the honesty of either, or warning come as exhibiting the greatest proficiency in the art of music. There are no men who have

the world in Europe, and the Auditor's account shows an excess of 10 percent of securities over its circulation.

The Alleganians—The performance of these last evening was truly excellent—interesting to those who have their cars open to the luxury of either, or warning come as exhibiting the greatest proficiency in the art of music. There are no men who have

the world in Europe, and the Auditor's account shows an excess of 10 percent of securities over its circulation.

the world in Europe, and the Auditor's account shows an excess of 10 percent of securities over its circulation.

News for the Ladies—Mrs. Sulley has returned from New York with a magnificent collection of Millinery and Fancy Articles, Embroideries, Laces, Ribbons, Trimmings &c. and all

the latest fashions. Mrs. Sulley has received a great many letters from friends in the state by her.

Admiral Seymour had abandoned the Dutch

Port and the factory gardens, and had strength

ened his position lower down the river. Recruits

were expected from Singapore.

All the Western suburbs of Canton were

burnt on the 12th of January by the English.

A large fire had also occurred inside the city.

The manufacturers of the districts had issued

most strenuous edicts against the English, and had offered rewards for assassinations and incendiarism.

All the Chinese of Hong Kong have been ordered to quit the services of foreigners and return under penalty of destruction to their relatives remaining at home. Consequently nearly all Chinese servants had left their situations.

Letters received from Hong Kong say that private advice from Hong Kong are of the most alarming character.

The household of Canton had exiled the Chinese to a general movement against foreigners. The population are beginning to show unusual courage and creating great apprehension.

The movement is not confined to China alone, but has spread to Singapore, where the Foreign Legation has been obliged to arm themselves against sudden attacks from the infuriated Chinese.

Another letter, received from Hong Kong, says that the fire in the suburbs of Canton was so intense that the whole city became one sheet of flame.

The Paris correspondent of the London Post says that the fire will be quenched by the 15th instant, and will shortly become one of the most attractive places to be found. It is needful to add that the fire, will never allow less to say more—Mrs. Sulley has received her reward.

Admiral Seymour had abandoned the Dutch

Port and the factory gardens, and had strength

ened his position lower down the river. Recruits

were expected from Singapore.

The characters are well drawn and well

acted, and the establish feeling which tempts me to make the attempt to tell this pretty good customers. But I am sorry it is not a matter of political importance.

It is a genuine, beautiful, fashionable, and will shortly become one of the most attractive places to be found. It is needful to add that the fire, will never allow less to say more—Mrs. Sulley has received her reward.

BY virtue of an Execution to me directed by the
Clerk of the Allen Circuit Court, I have levied upon
and will oppose for sale by public auction, at the
Court House door in Allen County, Indiana,
between the hours of twelve o'clock P. M. and four
o'clock P. M. of the 15th day of April, A. D. 1857, the rents and profits for a term of years not exceeding
seven, of the following described property, to-wit: The south-east quarter of section seventeen (14),
containing one hundred and forty acres, more
or less, situated in Allen County, Indiana, and
to-take to realize thereon, the full amount of
the judgment, interest thereon and costs, I will at
the same time and place, sell the same to the highest
bidder, for the sum of the estate or
otherwise, to be paid to me by the person of the estate.
*Ordered to be sold in said execution in the
case of George Craig vs. George Pugh.*

W.M. FLEMING, Sheriff A. C.

L. M. NINDE, Comt.

(\\$100) 38-23

March 26, 1857.
